Don't let its kid-friendly look fool you: Star Wars Rebels is essential viewing for Star Wars fans both young and old. The follow-up to Star Wars: The Clone Wars, this beloved animated series follows a ragtag group of resistance fighters as they battle a budding Galactic Empire in a story that bridges the gap between Episodes III and IV. It's filled with heart, humor and some of the best Star Wars characters across any medium, complete with gorgeous art direction that feels faithful to the original trilogy. Rebels is heading into the last leg of its fourth and final season on Feb. 19, so we don't blame you if you're looking to catch up in order to give Ezra, Kanan, Hera and the rest of the Ghost crew a proper goodbye. Here's how to get your Star Wars Rebels fix online. Disney XD and Streaming Services Star Wars Rebels airs on Disney XD, which is available in traditional cable packages as well as in most online TV services. If the channel is part of your cable package, you can log into Disney XD's website with your provider information and stream every episode online. Don't have cable? No problem. Disney XD is available on virtually every major internet TV service, including PlayStation Vue, Sling TV, YouTube TV, DirecTV Now and Hulu Live. These services are your best option for catching new episodes of Rebels live, and are arguably the most cost-efficient (assuming you plan on blowing through the whole series in a month). Sling TV is your cheapest point of entry at \$20 a month, which includes on-demand functionality but no DVR. (You'll have to pay an extra \$5 for that.) YouTube TV and DirecTV Now both start at \$35 per month — the former service has both DVR and on-demand, while the latter only has on-demand for now (DVR is coming later). At \$40 a month, Hulu With Live TV and PlayStation Vue are the priciest options of the bunch for getting your Rebels fix. However, both services have DVR functionality and more than 45 channels each, making them good picks for folks who want to watch a lot more than just Star Wars. MORE: Hulu Live vs. YouTube TV vs. Sling vs. Vue vs. DirecTV Now: Face-Off! Disney Now Star Wars Rebels is partially available on the Disney Now app, which is available on the web, Roku, Kindle, iOS and Android, and features a mix of free and provider-restricted content. The app is currently limited to Season 4 -- you can watch the first two episodes for free, but you'll need to log in with your cable provider to get the rest. Buying on Amazon Video, iTunes or Google Play If you'd rather not sign up for an online TV package just to watch Star Wars Rebels, you can always just buy individual episodes and seasons from Amazon Video, iTunes or Google Play. Individual episodes cost \$2.99 for high definition (HD) and \$1.99 for standard definition (SD), though the price of full seasons varies by platform. Amazon has the best overall deal on full seasons, with season 1 and each half of season 2 available for \$13.99 in HD and \$9.99 in SD. The extra-long season 3 will run you \$27.99 in HD and \$23.99 in SD. Season 4 is available for \$19.99 in both HD and SD. On Google Play and iTunes, the shorter seasons cost \$19.99 (HD) and \$14.99 (SD) each. Google Play has season 3 for \$29.99 in HD, and season 4 for \$19.99 in HD. iTunes has season 3 available for \$39.99, and season 4 for \$29.99, both in HD. Any episodes you buy will be permanently accessible on your account of choice, and, unlike on TV services, will run without ads. Amazon Video, iTunes and Google Play all allow you to download your purchased episodes to your mobile devices, making buying a good option for folks looking to binge on the go. Image Credit: Lucasfilm There are casual fans of the Star Wars movies, and then there are those for which Star Wars is more than a film franchise — it's a way of life. Whether you fall into one camp or the other, chances are pretty good that you want to watch them all more than once. Contents Streaming via subscription Purchasing digitally If you own the films on Blu-ray or UHD Blu-ray, this isn't a problem, but what if you prefer that your movies don't take up any space in your living room? There was a time when it was difficult to watch anything with Star Wars in its name online, but things have changed, and now it's possible to watch all the Star Wars you could want using a TV and your internet connection. Let's run through your options. Note: These recommendations are for U.S. residents. International availability varies by region. More Star Wars Streaming via subscription Disney+ Disney has its own streaming service, Disney+, that launched in November 2019 and has already become the streaming destination for all things Star Wars. All of the existing Star Wars trilogy movies (including the original trilogy, prequel trilogy, and sequel trilogy) can be found on Disney's streaming hub, along with spinoff films Rogue One and Solo, plus multiple Star Wars specials and documentaries. Basically, it's one-stop shopping for Star Wars fans. The library of Star Wars titles on Disney+ is just as comprehensive on the TV side, too. Popular animated series Star Wars: The Clone Wars, Star Wars: Rebels, and Star Wars: Resistance are all available in their entirety on the service, as well as some lesser-known shows. Disney+ is also the home of the new series Star Wars: The Bad Batch, and the service also has several new, live-action series available or in development for Disney+, including The Mandalorian and upcoming shows based on Obi-Wan Kenobi and Rebel spy Cassian Andor from Rogue One, among other popular characters and franchise elements. Disney XD If you're a cable or satellite customer, there's another option for watching the animated series Star Wars Resistance and Star Wars: Galaxy of Adventures. Head over to Disney's XD page, sign in with your cable or satellite provider (assuming you pay for a package that gets the XD channel), and you'll be able to watch some (but not all) episodes of both shows. Purchasing digitally Now that we've covered all of the (limited) options for streaming Star Wars content, let's move on to the most feasible method: Just buying it. If you're a big fan, purchasing the films digitally isn't such a bad idea — if you're going to watch them every year or so, the investment will eventually pay off. Some of the films and TV series are available to rent, but not all of them. That said, the Movies Anywhere initiative allows users to watch any Disney films purchased digitally from one platform, regardless of where you buy them. It's a cool program for library consolidation purposes, though we expect that if you're buying one movie from Amazon, you probably buy most movies from Amazon. Still, with Microsoft joining Movies Anywhere, it means you can buy from any of the sites below, with the exception of YouTube, and watch wherever you want. Amazon Amazon is the first place most people go to buy stuff online, and it's a fine choice for Star Wars fans, too. Each of the nine feature-length films is available for digital purchase; pricing for HD purchases ranges from \$15 to \$20, depending which movie you want and which version you want (bonus content, etc.). Full seasons and individual episodes of Clone Wars, Rebels, and Resistance are also available to purchase. YouTube YouTube's Movies section also offers all the official Star Wars content for purchase. You can also rent some Star Wars films from YouTube — unfortunately, that only includes Episode VII, Episode VIII, Rogue One, and Solo for between \$4 and \$6. Otherwise, you'll have to take the plunge and buy. As with Amazon, pricing varies between \$15 and \$20. If you want to watch Rebels, YouTube is a good place to get it — the whole series is available for purchase, either by season or by episode. High-definition is a bit more expensive, as you might expect. Clone Wars is also here, as is the first season of Resistance. Google Play Like Amazon and YouTube, Google has all the movies for you to buy. You can purchase individual movies for \$3.99 each, or get the sequel trilogy for \$39.99. Fans will probably prefer the \$99.99 nine-movie collection with the entire Skywalker Saga. Google Play allows users to watch Resistance for the low price of \$1.99 per episode or \$29.99 per season. Clone Wars and Rebels are on Google Play, too, and at an even lower per-season cost. iTunes If you're an Apple user, simply rent or buy movies directly through the iTunes stores. In that catalog of films and shows, you'll find titles like Clone Wars, Rebels, and Resistance, as well as the entire nine-movie Skywalker Saga. If you enjoy higher-resolution movie-watching experiences, then we want to note that not all content is available in standard definition. You may need to consider other platforms for 4K viewing options. Microsoft Microsoft has similar tools to rent or buy movies and TV shows for Windows and Xbox One users. Star Wars fans can utilize the Microsoft Store to find titles, although it does offer fewer options than competitors. It doesn't have any of the animated series, which could disappoint some hopeful viewers. The feature films are fortunately priced comparably to other competitor platforms. You have the option to buy the movie alone through Microsoft or spend a few extra dollars to unlock hours of bonus content. Microsoft also offers a sequel trilogy bundle— which means you can access three films for \$39.99, or you can select the entire nine-movie Skywalker Saga movie bundle. Editors' Recommendations
